

Automated Stores Hub

Specification Overview

Purpose

Ensure commercial control of your project and reduce downtime when it comes to distributing and tracking tools on smaller shutdowns and construction projects. Our Automated Stores Hub combines cutting edge technology to remove the need for staffing that is typically required to facilitate distribution of specialised tools, equipment and industrial supplies.

Ideal for smaller rolling shutdowns, turnarounds and outages, where you need tools and equipment located closer to the worksite. The Automated Stores Hub is a low cost, low security option where trusted teams understand the importance of having fast, agile access to the right tools and equipment.

Manufacturer

SFI Australia

Category

Specialised Tools, Equipment, Industrial Supplies and Consumables

Powered by **Monitor** ⚡

Automated Stores Hub Specification Overview

Key Features

- Customise tooling lists, consumables and industrial supplies based on your projects needs
- Portable design, located where the tools are required
- Fast scalable solution for small or large quantity of tools, equipment and industrial supplies
- Modular interface can be adapted to suit existing storage options such as storage rooms and larger containers

General Specifications

- Dimensions
 - Height: 2870 mm
 - Width: 2430 mm
 - Depth: 6040 mm
- Weight
 - Empty ~kg (max)
 - Loaded (Recommended) ~kg (max)
- Power supply: Power consumption
 - Idle:
 - Operating:

Applications

- Warehouse
 - Fast access to packing materials, PPE, and tools
- Manufacturing facilities
 - Controlled distribution of cutting tools, lubricants, and maintenance supplies
- Mining operations
 - Secure dispensing of safety gear and high-value consumables at remote sites
- Construction projects
 - Point-of-use access to consumables, fasteners, and PPE on large job sites

Construction

- Welded steel frame
- Dual skinned walls (compared to single skin)
 - Superior thermal performance
 - Mitigates condensation
 - Allows for optional insulation (optional)
 - Sound absorbing
- IP57 Ingress protection
 - Dust resistant
 - Water resistant
 - Can be cleaned with water jet power washers
- Fork pockets
- Lifting points
- Door
 - Key lockable
 - Steel construction
- Latches in the open position

Electrical & Lighting

- LED lighting
- External Power inlet and outlet
 - IP66 Ingress protected
 - Allows rapid power connection
 - Daisy chain multiple units
- Safety Switch
 - Internal power outlets

Warranty & Support

- Standard warranty
 - 12 months parts and labour
- Support
 - Business hours

Compliance & Certifications

- CE, RCM, and ISO 9001:2015 certified
- Meets Australian electrical safety and EMC requirements
